

11b Swedish:

Technique Demo and Practice

Posterior and Anterior Foot

11b Swedish:

Technique Demo and Practice - Posterior and Anterior Foot

Class Outline

5 minutes	Attendance, Breath of Arrival, and Reminders
15 minutes	Pep talk
70 minutes	1st massage
20 minutes	20-minute break
70 minutes	2nd massage
10 minutes	Closing circle
3 hours, 15 minutes	Total

11b Swedish:

Technique Demo and Practice - Posterior and Anterior Foot Reminders

Quizzes and Exams:

- 13b Kinesiology Quiz
 - Tibialis anterior, fibularis longus and brevis, quads, rectus abdominis, and pec. major
- 17b Kinesiology Quiz
- 17a Quiz
- 19a Quiz
- 21a Exam (100 questions in 80 minutes)

Assignments:

- 17a Review Questions (A: 131-140)

Preparation for upcoming classes:

- 12a Kinesiology: Muscle Names and Locations - Anterior
 - Trail Guide: quadriceps femoris group
 - Trail Guide: Pages 35-36, 61-62, 296-297, and 366-367
- 12b Swedish: Technique Demo and Practice - Anterior Lower Body and Abs
 - Packet F: 39-44

Classroom Rules

Punctuality - everybody's time is precious

- Be ready to learn at the start of class; we'll have you out of here on time
- Tardiness: arriving late, returning late after breaks, leaving during class, leaving early

The following are not allowed:

- Bare feet
- Side talking
- Lying down
- Inappropriate clothing
- Food or drink except water
- Phones that are visible in the classroom, bathrooms, or internship

You will receive one verbal warning, then you'll have to leave the room.

First half of the massage trade

Table setup

- Set up the tables in the configuration below
- Get out your supplies and dress your table
- Adjust the table height and get 1 chair per table
- Put all your stuff in the “basement”

The following is a sequence of foot techniques for both supine and prone positions.

Practice all of these movements diligently and apply them within your treatment as you see fit.

Be sure to cover the entire foot and ankle thoroughly and respond sensitively to the particular tension patterns of the foot.

Prone Position

1. Squeeze the foot
2. Apply circular thumb friction from calcaneus to toes in 5 lines
3. Pinch the heel
4. Conclude with tapotement and effleurage of hip, leg, and foot

Supine Position

5. Apply palmar effleurage to dorsum of ankle while holding foot
6. Do bilateral superficial fingertip friction around malleoli
7. Supporting lateral side, apply fingertip friction along medial side of Achilles tendon
8. Supporting medial side, apply fingertip friction along lateral side of Achilles tendon

Supine Position, continued

9. Apply thumb friction across the retinacula
10. With finger pad support on bottom of foot, full dorsum of foot
11. With thumbs on top, squeeze foot
12. With thumbs on bottom, wring from heel to toes and back - don't crush metatarsals

Supine Position, continued

13. For each metatarsal and toe:

- With thumbs together, thumb strip between metatarsals from toes to ankle
- Mobilize by scissoring metatarsals
- Hygiene permitting, slide index finger or side of a thumb in between toe (from top down or bottom up)
- Petrissage from metatarsal head to tip of toe (emphasis where toe meets metatarsal)
- Rotate, flex, hyperextend and traction each toe

Supine Position, continued

14. Apply thumb compressions to the arches of the feet
15. Repeat wringing of the foot
16. Apply two-handed vibration to foot at ball and ankle
17. Apply tapotement to the foot
