29a Pathology: Integumentary System Lesson Plan

<u>Minutes</u> <u>Activity</u>

Reminders 10 minutes before class begins display the reminders slide.

- 5 Attendance and Breath of Arrival
- 55 **Lecture** Pathology Integumentary System
 - Introduction (2m).
 - Lesions (2m).
 - Contagious Diseases (20m):
 - Parasites (4m).
 - Mycoses (3.5m).
 - Herpes (1m).
 - Staph (4.5m).
 - Strep (3m).
 - Warts (4m).
 - Non-Contagious Inflammatory Skin Disorders (3m).
 - Neoplastic Skin Disorders (14m):
 - Seborrheic keratosis (1.5m)
 - What does malignant mean (3m).
 - Review of the layers of the epidermis (3.5m).
 - Squamous cell carcinoma (1m).
 - Melanoma (5m).
 - Skin injuries (10m).

60m Total Class Time

29a Pathology: Integumentary System Lesson Plan

Learning Outcomes

- Program Level:
 - Students recognize names and descriptions of conditions they may encounter, and are reminded that it is important to screen for such conditions.
 - Understand enough of the vocabulary and mechanisms of pathology so that when a client has a pathology you will be able to know if there are any contraindications and modifications OR you will be able to look it up in the pathology book and the book will make sense because you have a basic understanding of human anatomy, physiology, and pathology.
- **Course Level:** Relate to pathologies by breaking down the names, and sharing experience with those who have encountered them personally.
- **Class Level:** Differentiate highly contagious from merely locally contraindicated.

Class Schedule – Student Preparation

- Werner: Chapter 2.
- Packet E: 59-64.
- RQ Packet A-153.

Topic Focus

• Pathologies of the integumentary system.
