Cancer (history)	Skin Conditions	Varicose Veins
Allergies	Autoimmune Disease	

Please note any recent injuries, surgeries, major accidents, or serious illness/conditions:

Please list any medications or supplements you are currently taking for any of the above conditions:

Are you pregnant or trying to become pregr	nant?	No Ye	es: Due Date _		
Clients are asked to keep the clinic info	rmed on	any change	s to the above	e information.	
Previous massage/bodywork experience	Never	Occasion	ally Often	ype(s)	

I understand that: Massage therapy (Which include styles of: Swedish, Sports, Deep Tissue or Deep

Massage) involves neither diagnosis nor treatment of any condition and is not a substitute for medical care. Draping will be used at all times. This is a full-body massage unless otherwise requested. <u>Neither breasts nor</u> <u>genitalia will be massaged</u>. I may itemize here any areas on my body that <u>I wish to be avoided</u>, and these will be totally avoided (itemize here if relevant):

If I am uncomfortable for any reason I may request to end the session and it will end promptly. If client is under the age of 17, written consent from client's guardian or parent is required. I affirm that I am able to receive Massage Therapy and that any of the information I have provided above does not prohibit me from doing so. I am aware that if I have a medical diagnosis that prohibits me from receiving Massage I must provide physicians written consent prior to services. MASSAGE SCHOOL & CLINIC

Treatment Record

Client Name \_\_\_\_\_

Date \_\_\_\_\_

Student Therapist \_\_\_\_\_

S: Subjective or what the client reports about their status (client goals, functional limitations, and diagnosis/clearance from a physician)

#### O: Objective or findings made by the therapist

(client posture, client movement, palpation of client during interview, details of focus area treatment)

A: Assessment or how the client rates the pain or discomfort of a focus area (0-10, 0 = no pain, 5 = moderate pain, 10 = worst possible pain, recorded before and after treatment)

Before treatment:	After treatment:

#### P: Plan or a strategy for further care

(client education, self care such as movement or stretches, future massage session ideas, referrals)

Personal reflection or meaningful insights made by the therapist about the therapist

### Treatment Records SOAP Notes

- Remember that you and the client must sign the intake form BEFORE the massage happens! This is an indicator that you read your client's intake form and have considered the indications and contraindications, including areas to avoid.
- Always make sure your documents are dated and have first and last names.
- Protect these papers as they contain sensitive information such as personal info (birth date, address, email), medical conditions, medications, and more. Keep them for 2 years, update the intake whenever information changes or at least every 2 years.

### S = Subjective

### (what the client reports to you about their status)

- Client goals, expectations, and preferences
- Client functional limitations
- Physician's diagnosis or clearance

These are notes taken during the client interview and apply to *today's* session.

Interview example

- What brings you in, What is the focus
- Where do I avoid, any injuries, ROM
- Lubricant
- Pressure
- Anything else- speed, BMTs, likes and dislikes

Repeat it all back to the client (same page)

S = Subjective Example (what the client reports to you about their status)

For now, let's check only ask about What, focus (whatever you're learning that day), avoid (in the areas you're working in class), and lubricant (specifically allergies or preferences)

What: Relaxing massage, to have less stress Focus: Upper back, shoulders and neck Avoid: Stubbed right big toe 2 days ago Lubricant: Ok with oil, no allergies Pressure: Medium to firm, deep as needed. Ticklish behind knees <u>Allergies, stretches, BMTs: Told them about</u> BMTs for shoulders and neck <u>Other: Loves scalp massage but doesn't want oil in hair</u>

Why is important to write down specific details?

### A = Assessment

### (<u>OR</u> how the client rates the 'feeling' of a focus area)

- Assessment- When your client walked in and sat down, did you ask them how they are doing? Their response is their assessment. We interview them to get more details.
- What brings you in today? What is your focus area?
- What if they aren't in pain, don't have any tension and feel fantastic?
- Can I leave this blank? Writing NA (not applicable) is NA (not acceptable)
- When they get off of the table, you ask them, how are you feeling? This is your after assessment!
- Recorded first during the interview for each area of focus
- Recorded again after the treatment for each area of focus

### A = Assessment

### (<u>OR</u> how the client rates the 'feeling' of a focus area)

- Rating Scale of 0-10
  - 0 is no pain/tension/anxiety, 'feeling'
  - 5 is moderate pain/tension/anxiety, 'feeling'
  - 10 is the worst possible pain/tension/anxiety, 'feeling'
- We should be looking for 3 things when 'rating' the 'feeling'
  - Where is being affected
  - By What/'feeling'
  - Rating
- Recorded first during the interview for each area of focus
- Recorded again after the treatment for each area of focus

### A = Assessment Examples (<u>OR</u> how the client rates the 'feeling' of a focus area)

(For our current client, they mentioned they are stressed)

Before:	After:
<u>Client is very stressed,</u>	Client is very relaxed
Just wants to relax	could take a nap now

-or-

Before:	After:
Stress in head, neck	Stress in head, neck,
And back is a 6	and back is a 3

-or-

Before:	After:
Tension 6 in head,	Tension 3 in head,
neck and back	neck, and back

## First half of the massage trade

Table setup

Set up the tables in the configuration below Get out your supplies and dress your table Adjust the table height and get 1 chair per table Put all your stuff in the "basement"

### **Prone Position**

- 1. Squeeze the foot
- 2. Circular thumb friction from calcaneus to toes in 5 lines
- 3. Pinch the heel
- 4. Effleurage, tapotement, and nerve strokes of hip, leg, and foot
- 5. Repeat steps 1-4 on other leg

### **Supine Position – First Leg**

6. Full leg effleurage

7. Thigh

Effleurage

Full

Wring

Knead

Effleurage

8. Full gently around the patella

# **Supine Position, continued – First Leg** 9. Lower leg Effleurage Full 10. Tibialis anterior and fibularis longus/brevis Thumb circles Thumb tip compressions

11. Lower leg effleurage

#### **Supine Position, continued – First Leg**

12. Palmar effleurage to dorsum of ankle while holding foot

13. Fingertip friction around malleoli

14. Fingertip friction the medial and lateral side of Achilles tendon

15. Thumb friction across the retinacula

16. Full dorsum of foot

17. Squeeze the foot

18. Wring from heel to toes and back

### Supine Position, continued – First Leg

19. For each metatarsal and its toe:

- Strip between metatarsals from toes to ankle
- Mobilize by scissoring metatarsals
- Slide index finger or side of a thumb in between toes
- Petrissage toes
- Rotate, flex, hyperextend, and traction each toe

20. Thumb compressions to the arches of the feet

21. Foot wringing

22. Two-handed vibration at ball and ankle

### **Supine Position**, continued – First Leg

24. Tapotement to IT band, quadriceps, lower leg, top of foot

26. Nerve strokes down the leg to finish

27. Repeat steps 6-26 on other leg

### **Supine Position – Second Leg**

6. Full leg effleurage

7. Thigh

Effleurage

Full
